

```
*****
* Model Usage Notes:
* A. Features have been modelled
*   1. Output Voltage Setting
*   2. Internal Fixed Soft-Start
*   3. Frequency and Operation Mode Selection
*   4. Current Sense and Positive Overcurrent Protection(OCP)
*   5. Power Good
*   6. UVLO Protection
*
* B. Features have not been modelled
*   1. Operating Quiescent Current
*   2. Shutdown Current
*   3. Temperature dependent characteristics
*   4. Ground Pins have been tied to 0V internally and hence model does not support Inverting
*      topologies.
*
* C. Application Notes
*   1. The parameter STEADY_STATE has been used to reach the steady state faster.
*      Keep STEADY_STATE = 0 to observe startup behaviour.
*      Keep STEADY_STATE = 1 and appropriate IC on Inductor and capacitor to observe for faster Steady state.
